

CAR SEAT NETTING SYSTEMS

ABSTRACT OF THE DISCLOSURE

Car seat systems including a car seat assembly having a horizontal seat portion with a front edge and a rear edge and a vertical back portion with a top edge and a bottom edge. A sheet assembly includes a front sheet portion positionable above the front edge of the seat portion and side sheet portions positionable above the side edges of the seat portion. A tube assembly includes at least one vertical tube with the sheeting assembly coupled thereto. The tube is positionable adjacent to the seat portion. A securing assembly couples the sheeting assembly and tube in position with respect to the seat portion.
